

MedlinkR Plus

“Find your doctor, Fund your Care”

By Dr John Aigbonohan
Project Manager

The Product

MedlinkR is a medical platform that connects patients, hospitals and treatment funding partners in Nigeria, Africa and other parts of the world. It will operate as a medical tourism business that offers the following services:

1. A search engine for trusted and highly specialized hospitals and specialist doctors for the chosen scope of medical specialty areas (Cancer, Heart, Kidney, Orthopedics, Mother and Child, Fertility, Cosmetics/Plastic Surgery and General Surgery) within Nigeria and outside Nigeria (India, Turkey, UAE, Czech Republic, Netherlands, Dominican Republic, St. Kitts & Nevis)
2. Telemedicine specialist appointment reservation and order fulfilment platform where patients can book, manage their appointments with on boarded specialist doctors and pay for their consultations.
3. Platform where patients with confirmed/ planned specialist treatment/procedure in a **selected hospital (as per criteria)** can solicit/apply for financing from willing donors (individuals or groups)
4. Platform where trusted medical missions organizers/project coordinators can post their upcoming projects and attract funding from corporate/group/individuals who have a practice of donating to such causes. (CSRs etc)

The Problem

MedlinkR will solve 3 problems

1. Delays in accessing/reaching trusted, highly specialized care for specialty cases in scope by setting up informative and facilitated specialist-patient encounter confirmation platforms
2. Lack of funds to pay for specialized medical treatment due socioeconomic realities in Nigeria by creating the “find your doctor, fund your care” products
3. Donor apathy due to limited options of trusted and organized medical missions project management coys

The Healtech Industry - Nigeria

- Health tech globally over the past three years thanks to the pandemic.
- African healthtech is coming of age buoyed by market drivers such as the pandemic, population size, data analytics, and consumer-centricity.
- Reports say health tech in Africa should reach a market value of over US\$11 billion by 2025
- In 2020, healthtech startups across the continent raised less than \$100 million, but that number increased to \$370 million in 2021 (African VC landscape)

Reliance Health

- In 2015, the three co-founders launched Kangpe, a telemedicine-focused startup in Nigeria with a “doctor in your pocket” slogan. Pivoted from telemedicine focus to integrated healthcare provider Reliance HMO
- Individuals can select monthly, quarterly or yearly health plans ranging from ₦3,500 (~\$7.00) to ₦148,500 (~\$297.00).
- Businesses subscriptions on behalf of their employees; cheaper than retail customer prices
- Over 200,000 individuals, 600 Companies, including Biersdorf Nivea, Jumia and PwC, while maintaining an attributable intention rate of 99%
- With an app, these customers can chat with a doctor, find healthcare providers near them to visit or get medications from and manage the delivery of their drugs.
- The six-year-old startup said it has averaged a 3.5x year-over-year revenue growth from 2016
- **Investors include General Atlantic**, Partech, Picus Capital, Tencent Exploration, Asia Africa Investment and Consulting (AAIC), P1 Ventures, Laerdal Million Lives Fund and M3, Inc.
- After Series A investment : \$6 million in January 2020, Total \$48million has been raised in 3 rounds

The Problem –Cancer (Case in point)

- World Health Organisation's 2020 report shows that cancer tops the list of killer diseases with nearly 10 million deaths.
- Nigeria has one of the highest cancer mortality rates in the world; app **4 out of 5 resulting in death** (*Global Cancer Observatory*)
- No efficient public policy on cancer issues in **Nigeria; 10,000 cancer deaths are recorded annually with 250,000 new cases recorded yearly**. Since 2018, 4yr Cancer Control Plan yet to take off. Worsening medical tourism problem that consumes over \$1 billion annually.
- Responsible for over **78,800 deaths** in 2020 esp in **women (breast and cervical)** in Nigeria. At least **44,699** women died of cancer in 2021.
- Most Nigerian cancer survivors are rich (Money or social network). Other causes of deaths are **prolonged appointments, equipment breakdown, high cost of care**
- With NHIS covering less than 5% of cost of care, Specialty care such as radiotherapy costs about **N1 million per person per treatment cycle at the Lagos University Teaching Hospital**.
- The average cost of treating cancer comprehensively for one patient estimated at **N20 million** for chemotherapy, overall. Minimum wage hovers around N30,000.
- India has >200 comprehensive cancer centres (most philanthropy-funded non-profit / non-governmental institutions) **Nigeria has none**.

The Problem –Cancer (Case in point)

- an estimated 28.4 million new global cancer cases would occur in 2040, a 47 percent rise from 2020.
- The relative magnitude of the projected increase is highest in low Human Development Index (HDI) nations (95 percent), including Nigeria.
- Contrary to the WHO recommendation of **1 doctor to 600 patients**, in Nigeria **1 doctor serves 5,000 patients** and **16.1 nurses and midwives per 10,000 patients**.
- Currently, Nigeria accounts for **less than 90 oncologists**.

Medical Tourism market size

Over 5000 Nigerians travel out for medical treatment monthly

- ✓ Nigerians spent \$11 Billion on Health Expenses abroad btw 2011 and 2021 (Q1)
- ✓ \$2.56 Billion in 2019 (Highest)
- ✓ \$17 Million in 2016
- ✓ At least \$1 billion spent annually
- ✓ 60% of this spend cuts across Oncology, Orthopedics, Nephrology, Cardiology, (*CBN balance of payment data*)

The Customers & their needs

Specialist hospitals in chosen scope of specialty areas

- -Visibility and easy booking or referrals for specialty services
- -Traffic of care seekers, donors to patients scheduled for procedures at their facilities and medical missions funding partners
- -Revenue from successful completion of treatment
- -Positive reviews from treated, satisfied patients

Patients in need of specialist care

- -A user–friendly search engine with trusted and highly specialized hospitals and specialist doctors for the chosen scope of medical specialty areas.
- -Telemedicine specialist appointment reservation and order fulfilment platform where they can book, manage their appointments with on boarded specialist doctors and pay for their consultations.
- -Platform where patients with planned specialist procedures in selected hospitals can solicit/apply for financing from willing donors (individuals or groups)
- - Reliability of platform to deliver what it promises
- - Integrity of funds handling and disbursement (Transparency)

Donors (Individuals and Groups)/Corporate

- -Proof of capacity and integrity of MedlinkR business and platform to organize and handle funds and transparent accountability
- Specialty treatment information (Missions or individual) and required amount for treatment/project
- -**How to donate**: Safe and sustainable donation platform/system for repeated donations e.g.
 - personal wallet system on platform
 - "Donate by specialty"** by choosing a dedicated area of support, see amount required for treatment for certain patients
 - Personal donation account statements
- Giving back to Donors- free/discounted services ????
- Video and Picture Testimonials from recipients of donations

Updates

Justification for projections

- Major telemedicine operators in Lagos have 2000 to 2800 subscribers
- Tremendoc has recorded 108,000 tele consultations over 1 to 2 years. Cheap N1000 subscription but quality is not as optimal (Founders comments)
- EHA Get care charges N5,980 and N7,500 charges for GP consultation
- Awaiting survey responses from Travel Agencies and Medbury clientele database

How to sell

- Subscription model is largely employed by many Telemedicine providers in Nigeria
- Partnerships with hospitals, corporate organizations
- Sponsorships with corporate organization to administer their telemedicine platforms for a fee-Grassroots, in major Nigerian languages
- Patient Education, Awareness creation, Incentives for subscription
- Add-ons with travel products

Crowdfunding strategy

- Partner with reputable Project managers with healthcare crowdfunding experience and practice to function as panelists for vetting and approving applications for funding and boosting the profile of MEDLINKR
- Dr. Uche Amazigbo,
