

MEDLINKR APP

Updates July 2023

Executive Summary

The **MEDLINKR APP** occupies the **mHealth** sub-segment of the **digital health** segment **Healthcare Ecommerce market**.

It is a innovative product that is targeted at solving healthcare quality problems such as:

- prolonged commuting and waiting times, misdiagnosis and over-diagnosis, medical errors, poor treatment outcomes from late diagnosis, multiple sign-ups on digital health platforms.

The market opportunity stems from

1. Worsening **Doctor-to-patient ratio to 1 : 5000** due to “Japa” phenomenon.
2. Less than **10%** of Nigerians have **Managed care (Health Insurance)**.
3. Increasing uptake of mobile technology by businesses (including healthcare providers) and growing no of internet users. **42.84m people (23.7%) in 2015 to 96.05 million (46.6%) in 2020. 55.4% at the start of 2023. 152.28m (or 65.3%) by 2025.**
4. Contribution of the digital sector to Nigeria’s GDP: 14.42% as of Q2 2021. There are increasing opportunities in PPPs to attracting innovative healthcare solutions in Public health

Total investment Amount: N 50,440,000

Year 1	Year 2	Year 3	Year 4	Year 5
910,991,897 (244,387,096)	1,680,885,859 (426,067,393)	2,938,819,471 (771,268,657)	6,926,501,919 (1,822,396,747)	15,021,225,986 (3,888,243,614)

Market Size, Segmentation & Analysis- The Health Tech Industry in Nigeria

(Market Study by Pharmaccess & Netherlands Consulate 2022)

Digital Health market size has grown globally over the past three years post-pandemic era.

- Desktop research reveal that HealthTech in Africa is projected to hit a market value of about N7 trillion (US\$11 bn) by 2025.
- In Nigeria, of about 136 health-tech startups, **mHealth & Telehealth (Ehealth)** segment players accounted for **30.1%**.
- Revenue in the **Health Tech** was estimated to reach N 190 trillion (US\$315.20mln) in 2022.
- At Annual growth rate (CAGR 2022-2027) of 17.42%, projected market volume is N421 trillion (US\$703.70 mln) by 2027
- User penetration will be 13.37% in 2022 and is expected to hit 19.20% by 2027.
- The average revenue per user (ARPU) is expected to estimated as to N 7000 (US\$10.88).

Market Size, Segmentation & Analysis- The Health Tech Industry in Nigeria

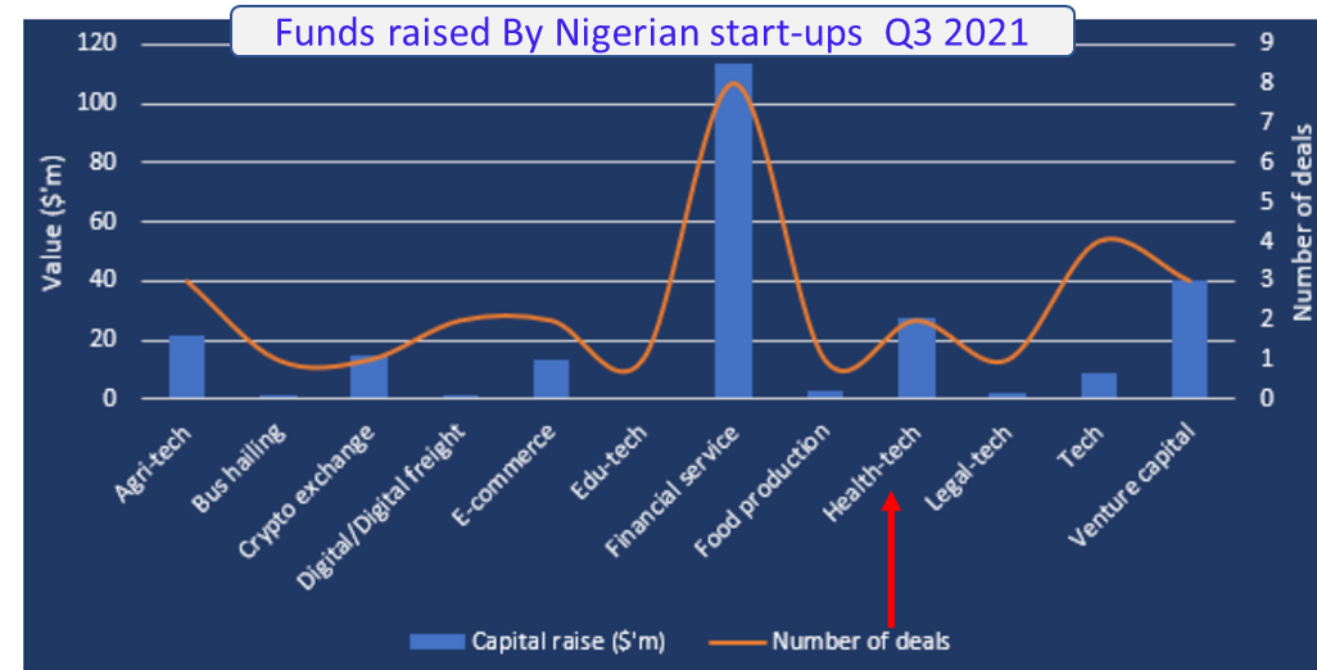

(Market Study by Pharmaccess & Netherlands Consulate 2022)

- Of the US\$4 billion raised by start-ups in Africa in 2021, Nigerian digital start-ups accounted for US\$1.37 billion (34.25%) placing the country as No 1 in the continent.

Case Study

Comparative analysis of **DrugStoc**, **Reliance Health**, and **CarePay**

- Only been around for about 6 years
- Been able to raise a combined US\$97 million dollars in capital, attracting global equity investors.
- Significant performance recorded.
- Investing in such start-ups provides opportunity for an attractive ROI for Dutch Equity Funders and VC firms.

SOURCE: Nairametrics

At the end of Q3 2021, Nigerian HealthTech start-ups raised US\$27.3 million in capital next only to financial services firms (US\$113 million), and Venture Capitalist firms (US\$40.1 million),

Market Size, Segmentation & Analysis- The Health Tech Industry in Nigeria

Pharmaceuticals Case Study

- **3 out of 5 (60%)** were shopping more online since the Pandemic. (Mastercard Study on personal spending in Nigeria)
- **57% of online shoppers** are buying **medicines and other personal care products online**.
- A McKinsey study predicts that Nigerian pharmaceutical market will grow as high as 9 percent yearly by 2026.
- **Pharmacies** would contribute between **\$950 million and \$1.1 billion** during the same period.
- In a Study in Uyo, only about a third (28%) of the consumers and 57% of the pharmacists were aware of the availability of online pharmacy services in Nigeria.
- 83% of the consumers indicated that access to online drug information and medicine advice via the service will be valuable.
- Retail pharmacy in Nigeria is underdeveloped with challenges in supply chain and distribution.
- “The endgame is building a network of pharmacies and a network of franchises,” Life Store Pharmacies

Five Forces Analysis-MEDLINKR APP

The Health tech industry sector is known to be young and capital intensive but receiving growing funding and penetration. The Aggregator business model is becoming more popular and in growing demanded by Businesses e.g. HMOs however, many aggregators are adopting offline, less tech models. The utilization rate of Health tech services is low due to cultural and cost barriers in entry into the market

New Entry

Barriers are high for entry due to:

Technology-related

- Capital intensive (High cost)
- Trust issues with Security of internet/digital payments
- Limited Network quality/coverage

Socioeconomic issues increasing need for high marketing cost

- Low utilization rate (Cultural/ Literacy levels)
- Poor government support

Substitution

Substitutes to access to healthcare exist such as Walk-in and home service, although quality is poorly regulated.

The existing platforms have created cheap subscription models with has capacity to absorb new customers .

Supplier

Suppliers' power is low due to several outlets of fast moving healthcare products and in many cities.

However, the technology to provide ecommerce services for healthcare is expensive to businesses

Buyer

The buys power is high due to options available.

The utilization is still low due to cultural and literacy barriers

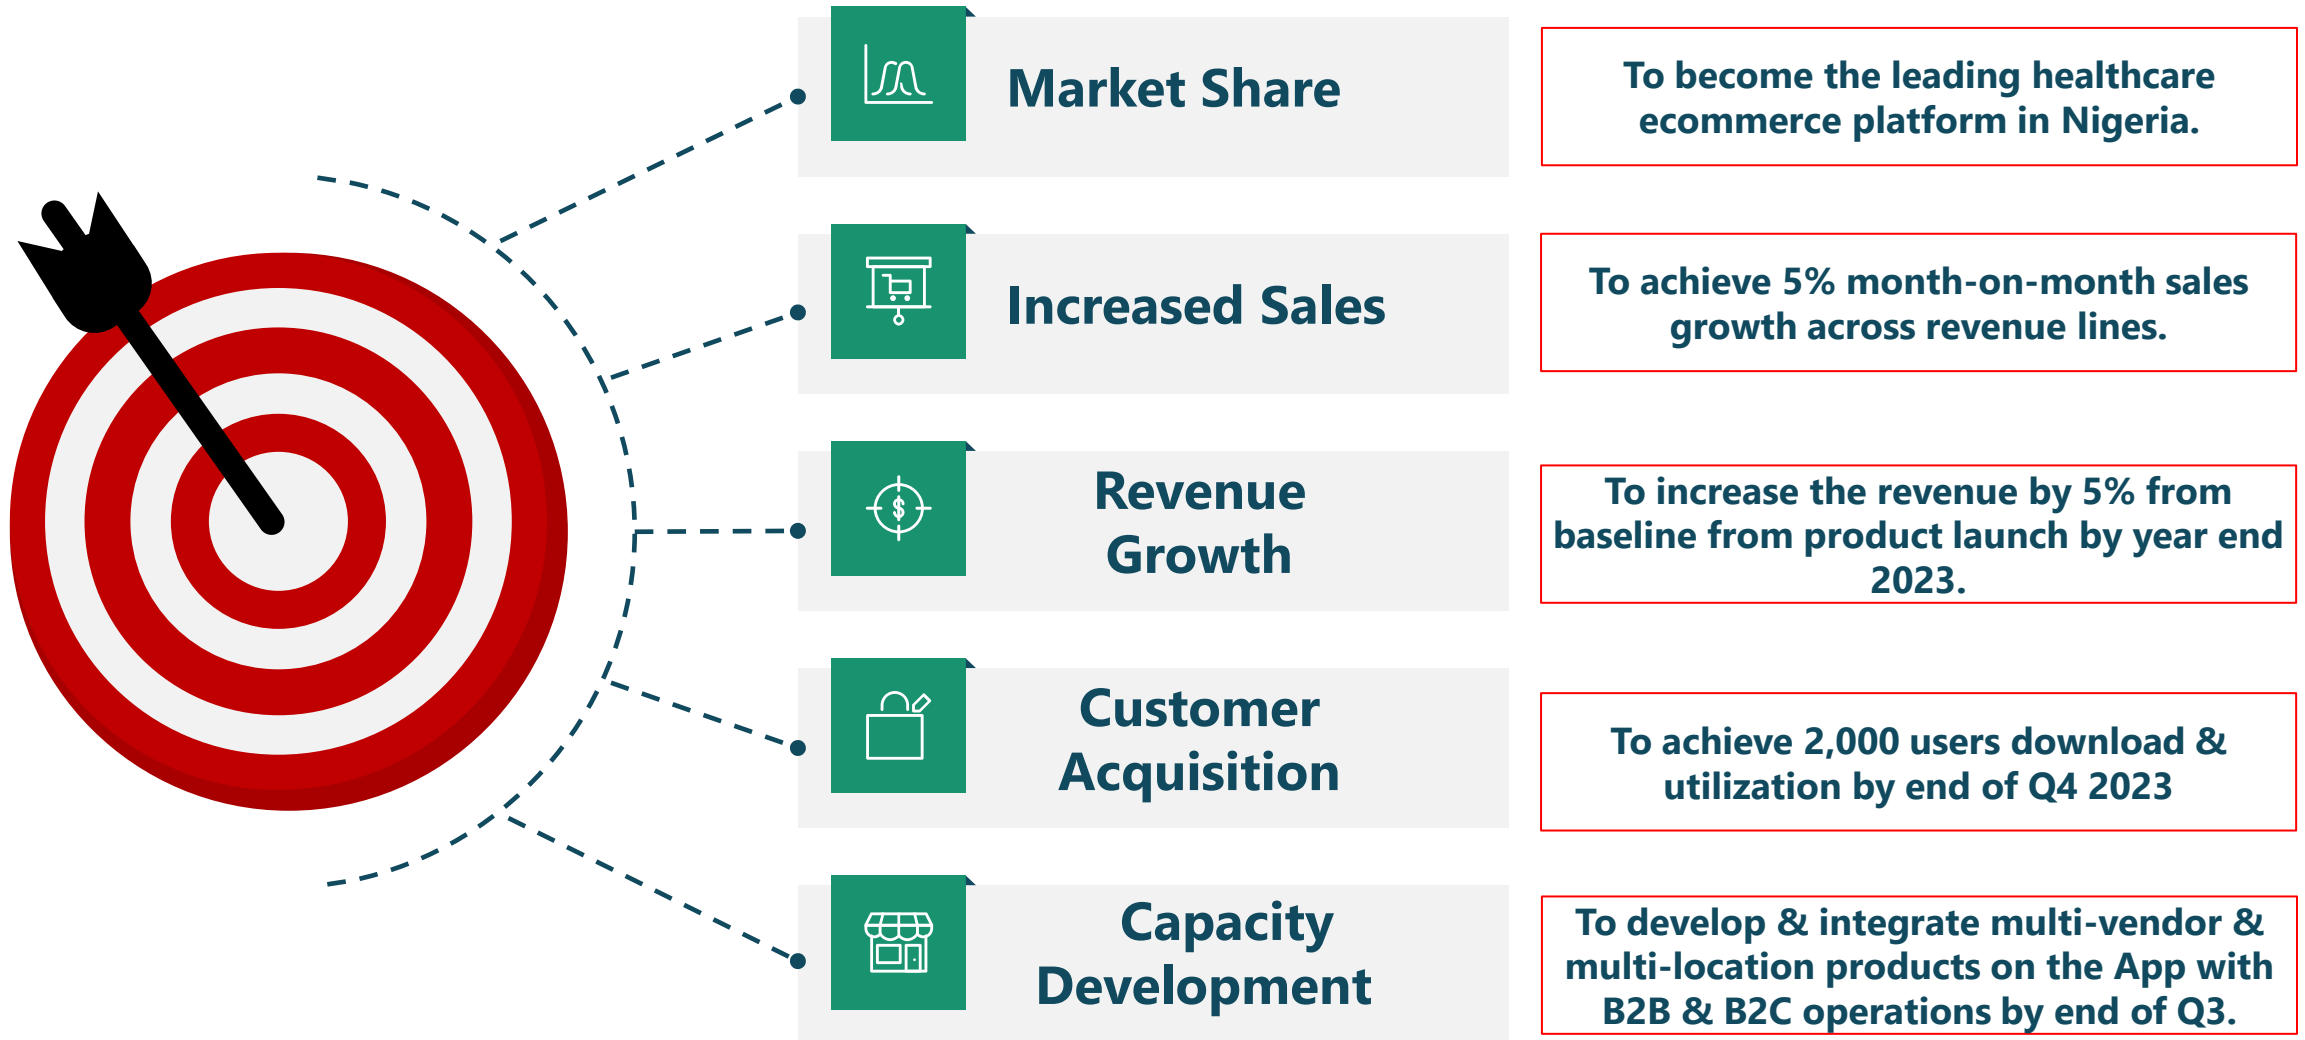

Competitive Rivalry

There are limited customers willing to pay and price is a major driver, hence it is a competitive space.

The rivalry is driven by price competition, advertising battles, product introductions and aggressive marketing.

Business Objectives –MEDLINKR APP

MEDLINKR APP-MARKETING & SALES

Client Category	Client	Divisions	Level of Demands
Tier 1	Business to Business	A. House hold/ Real Estate welfare services providers-Venco, B. Corporate organizations with periodic health screening and counselling services C. Corporate organization requiring outsourced emergency services arrangements	High volume of demands, largely for preventive health screening, Emergency services , Home delivery of Drugs, Telemedicine services
	Government organizations	State or local governments with General & Mental health promotion projects and Commercial Market health intervention programs	Highest demand for drugs and telemedicine services
Tier 2	Business to Business	➤ Domestic staff suppliers ➤ Schools with school health programs, Religious Organizations with Pre-marital and Family health services, ➤ Patients with prescriptions, patients needing home delivery of health/pharmaceutical services, Patients needing information and connection with sources of quality healthcare products and services	Highest demands for Preventive health screening, Beauty & Wellness , Fitness
	Business to Customer		
Tier 3	Hospitals and Wellness providers	Hospitals need of specialist mental health and Ambulance services	Low to Medium demand for telemedicine platforms for Mental health and Emergency services

Medlinkr App – SWOT Analysis

Strengths

- Brand reputation
- Highly-skilled personnel
- Strong financial base
- Experience with providing in-hospital and concierge diagnostics, medical supplies
- Experience with deploying Health tech solutions
- Large customer base

Weaknesses

- Medlinkr App owned facilities are available in limited locations
- Medlinkr App has no own product delivery mechanism
- Majority of the services offered via the App are controlled by third-party vendors

Opportunities

- 7.1% compounded annual growth rate of the Nigerian health tech E-commerce market by 2027
- Increasing internet and mobile phone penetration
- Increasing digital payments
- Globalization of medical services and cross border requirements

Threats

- Competitors & new entrants into the market posing Enterprise risks
- Unstable Fx rates
- Cultural factors limiting uptake
- Unclear Government policies on range of approved services for telemedicine providers
- Budget reviews by Corporates embracing cheap priced packages

Competitor Analysis

	Medlinkr App	Wella Health	Medplus	One Health

Critical Success factors

- MEDLINKR APP to be sold as tech product to Businesses
- Lifecheck to step up to conducting home sample collections in Lagos, Abuja and Port Harcourt
- Become the Go-to platform for Special drugs sourcing
- Become the go-to platform for drugs supplies during
- Content Creation strategy- Lead Magnet strategy- Podcast
- MEDLINKR APP should conduct Exhibitions regularly to create a shiny brand to attract Healthcare
- Points earnings for free purchase
- Develop our own products _Vitamin strips, Telemedicine in Phase 2- December 2023
- Develop marketing campaigns to drive downloads

- With almost half of the Nigerian population having internet connectivity, Nigeria is one of Africa's largest consumer markets.
- The market is projected to increase by 25.5 percent in 2023, contributing to the worldwide growth rate of 17.0 percent in 2023.
- According to ecommerceDB, five markets in Nigeria majorly contribute to the growth of e-commerce: electronics & media (39.3 percent), fashion (22.3 percent), furniture & appliances (15.7 percent), **food & personal care (12.7 percent)** and toys (10.1 percent).
- Ecommerce spending in Nigeria has grown to \$13 billion annually and is expected to hit \$75 billion in revenue annually by 2025
- Due to the rising cost of living consumers are becoming more price-sensitive and embracing money saving shopping options E-commerce platforms like Jumia offer competitive prices and deals, making it an attractive option for consumers.
- Online shopping also allows consumers to compare prices across different platforms, giving them the opportunity to find the best deals.
- Discount sales like Black Friday, Tech Week, and Brand Festival have also contributed to the growth of e-commerce in Nigeria, with consumers taking advantage of discounted prices and deals.
- mobile health apps are now among the fastest-growing app categories
